REAL-TIME INTERVENTION AND MANAGEMENT PLATFORM WITH GUIDED WORKFLOWS

DTAM™: Pathway to Prevention

Gather Publicly-Accessible Information in Real Time to Inform the Behavioral Threat Assessment and Student Safety Process

Enterprise-Grade Security and Multi-Region Data Residency

Includes Multi-Subject Tracking, Secure Evidence Storage, Photo Analysis, and PDF Reporting

Patent-Pending, Cloud-Based Software Solution for K-12 and Higher Ed

DTAM™ provides a centralized, proactive, and secure system for managing Digital Threat Assessments® and other worrisome behaviors with step-by-step, evidence-informed assessment protocols—helping K-12 and higher education teams detect risks earlier, respond faster, and ensure safer community environments.

The digital landscape remains a critical missing component in today's threat assessment process.

90% of modern threats are communicated online before violence occurs.

Source: Based on SSTs comprehensive data set (sample size over 800,000 students)

Only 15% of BTAM teams are utilizing publicly-available social media that would inform their threat assessment.

SECURE INTERVENTION MANAGEMENT SOLUTION

DTAM
Digital Threat Assessment Management™ Platform
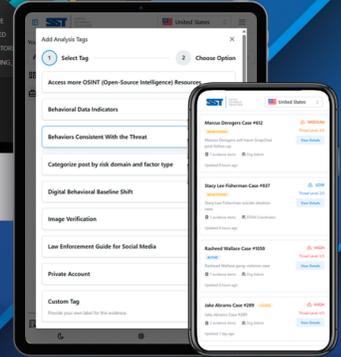

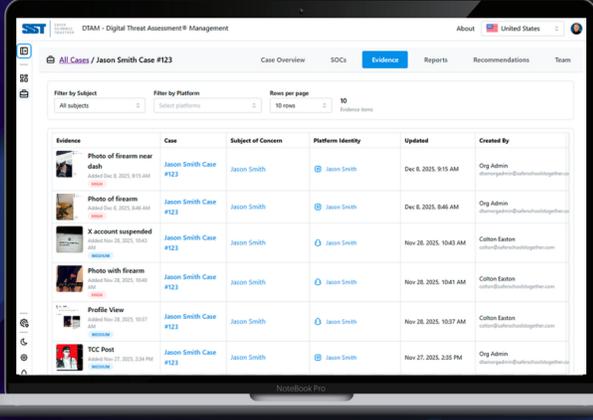

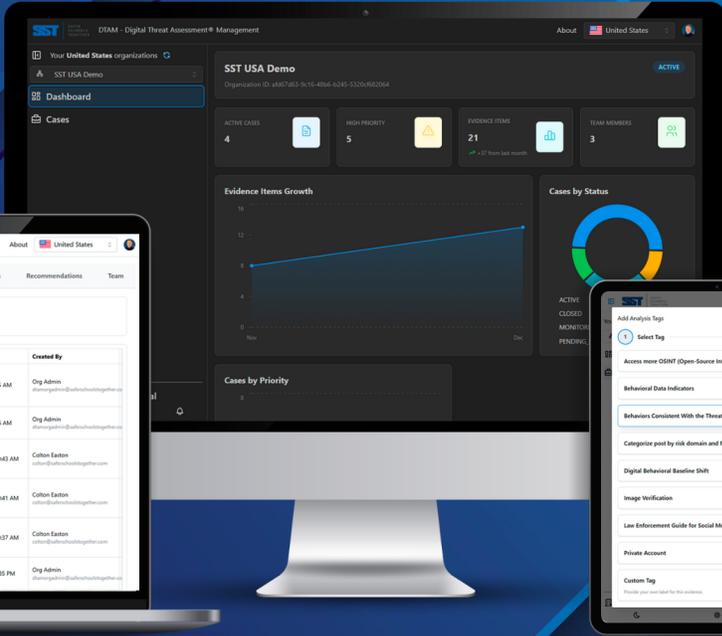

CLOUD-BASED SOLUTION

Because DTAM™ is a Cloud-based platform and operates in the Web browser, it is fully accessible across all device types, including desktops, laptops, tablets, and mobile phones—on both PC and Mac, as well as Apple® and Android® operating systems.

VERSATILE DTAM™ BENEFITS

SUPERINTENDENTS/ DECISION MAKERS

Protect your students, coordinate evidence gathering, and show proactive leadership in school safety.

SAFETY OFFICERS AND IT

Consolidate digital threat cases, streamline reporting, and ensure your teams work from the same playbook.

K-12 AND HIGHER EDUCATION

May be used by student safety teams in both K-12 and higher education for documentation and guidance.

Identify, Assess, and Manage Any Type of Concerning Behavior Before It Escalates:

- Threat-Related Behavior
- Critical Incident Response
- Bullying/Cyberbullying
- Suicidal Ideation
- Sextortion
- Sexual Assault
- Firearms
- Gang-Associated Behavior
- Substance Abuse Concerns
- Hate/Racism or Radicalization
- Non-Suicidal Self-Harm
- Illegal Activity
- Physical Violence
- School Community Concerns

Only 15% of school safety teams are utilizing publicly available social media information that would inform their behavioral threat assessment. DTAM™ bridges this gap by capturing and analyzing the "digital leakage" that occurs when concerning behaviors manifest on personal devices outside school infrastructure. DTAM™ ensures that school safety and threat assessment teams can make data-driven intervention decisions before situations escalate.

Extending far beyond traditional threat assessment, the platform serves as an essential tool for any situation requiring an evaluation of social media: from cyberbullying investigations and suicide risk assessments to assessing gang activity and behavioral intervention cases. The platform enables threat assessment teams to track multiple subjects of concern within a single case, document digital evidence with advanced photo analysis tools, and generate comprehensive reports.

DTAM
Digital Threat Assessment
Management™ Platform

DIGITAL BASELINE ANALYSIS TOOLS AT YOUR FINGERTIPS 24/7

OSINT Discovery Wizard
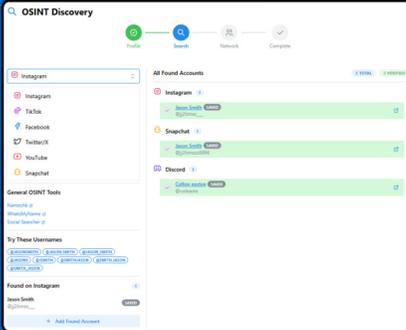

The Open Source Intelligence (OSINT) Discovery Wizard guides multi-disciplinary teams to locate subjects of concern across any public social media platform and build a comprehensive digital behavioral baseline.
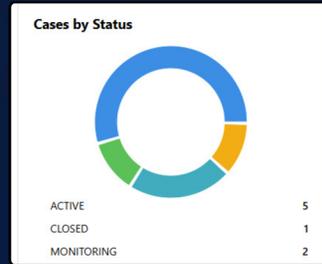

Digital Safety Plans

Create Digital Safety Plans with recommended interventions based on assessment findings with notifications e-mailed based on timing intervals of your choice.
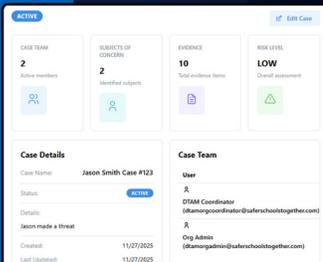

Guided Threat Classification
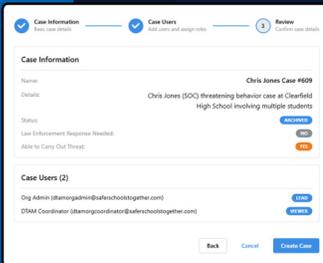

DTAM™ guides multi-disciplinary teams step-by-step through the process with evidence-based assessment protocols.
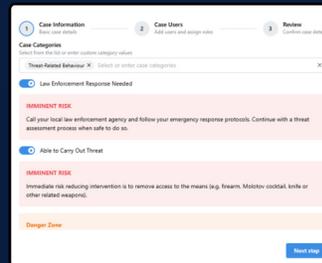

Dashboard Overview

Dynamic, visually-rich dashboard delivers a clear, at-a-glance overview of all case statuses and associated evidence.

Streamlines Digital Baseline Reports

DTAM™ integrates digital data with behavioral workflows to easily build digital behavioral baselines.
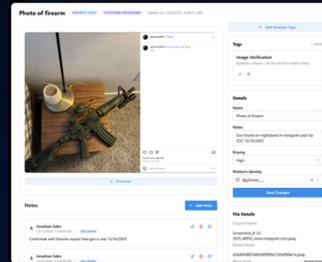

Real-Time Risk Assessment

Helps multi-disciplinary teams spot concerning behaviors earlier and create more effective interventions.

Multi-Platform Digital Evidence Collection

Captures digital leakage across platforms like TikTok, Instagram, Snapchat, Facebook, and X.
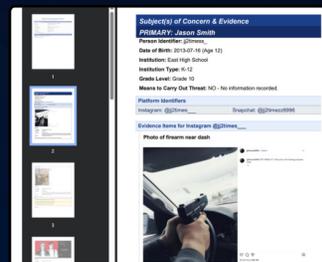

Expedited Image Documentation

The metadata associated with each screenshot is embedded directly within the image file for case records.

Digital Investigation Tools

Includes multi-subject tracking, secure evidence storage, photo analysis, and PDF reporting.

Professional Documentation and Reporting

Provides PDF or HTML case report documentation instantaneously with the simple click of a button.

Instant AI Analysis with SAVE

(Safety Analysis and Verification Engine)

The image utilizes a known social media code used to signal intent for self-harm or suicidal ideation upon finishing a lip balm.

HIGH RISK Risk Score: 85%

School teams need actionable insights into what an image may depict and whether it is a worrisome trend. DTAM's **SAVE AI** pipeline–evaluated by experienced SST experts based on previous ground truth data–is designed to alleviate the human work of evaluating concerning images and to provide guidance on best practices. The validated data comes from decades of SST's work in threat assessment, ensuring DTAM's AI pipeline is derived from best practices. **SAVE** may be used for image, baseline, and case analysis.

### Digital Behavioral Baseline Intelligence

Case Level Intelligence

Image Intelligence Analysis

Enterprise-Grade Security Protection for Data Privacy

DTAM
Digital Threat Assessment Management™ Platform

Built with enterprise-grade security and multi-region data residency to ensure FERPA compliance in the United States and FIPPA/PIPEDA compliance in Canada, DTAM™ transforms the current reality where publicly available, open-source worrisome digital behaviors can go undetected by providing school districts and higher education institutions with the specialized tools they need to protect their communities.
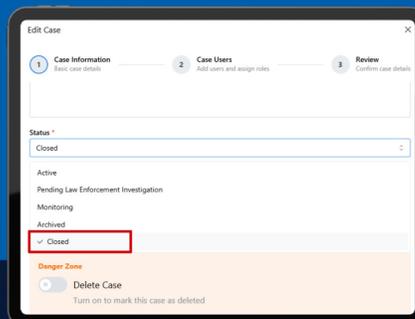

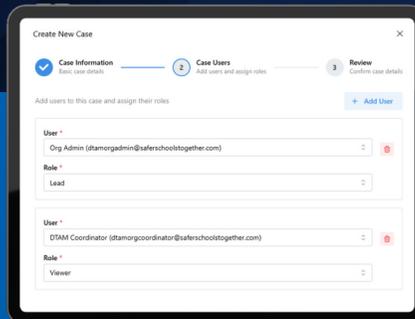

Multi-Layer Permission Setting

Extensive and intuitive multi-level role hierarchies and case level roles for optimal data privacy.

Chain of Custody

The user who initiates the case is responsible for closing it to ensure maintaining chain of custody.

Brought to You Exclusively from the World-Authority in Digital Threat Assessment®

🌐 **saferschoolstogether.com**

Since 2008, **Safer Schools Together** has established a proven record of helping schools minimize and manage their risks of student violence with reliable, professional thought leadership and guidance. The **DTAM™ platform** is the next evolution in providing intervention management tools directly in the hands of schools. This allows teams to help keep students safe while ensuring they receive appropriate support before issues escalate.
